

# LUGGAGE GLOVE

## WHAT SIZE DO I NEED?

One of the most common questions we get is: “What size will fit my luggage best?”

We have designed the Luggage Glove to be in the best proportion to the luggage sizes commonly found in the market. Generally speaking luggage comes in a Large, Medium and carry-on size so that all can be “nested” inside one another to save on shipping space.

The Luggage Glove is produced for carry-on luggage so in order to cater for the variety of shapes and sizes, we have made a guide to help the customer decide which option suits them best. Keep in mind that these sizes are based on the vertical **height** of the suitcase and **do not include** the wheels being measured:

SMALL		MEDIUM		LARGE	
Comfortable	Stretched	Comfortable	Stretched	Comfortable	Stretched
<b>60cm</b>	<b>65cm</b>	<b>65cm</b>	<b>70cm</b>	<b>70-80cm</b>	

“comfortable” means that the Luggage Glove will go over the suitcase easily and secure shut without too much tugging and pulling. It also allows for a bit of further expansion if the expander is used or after packing, the fabric suitcases are a bit more stretched.

“stretched” means that it requires quite a bit of effort to attach the lock underneath by pulling and tugging the material. Generally speaking, this can be used on hard suitcases because their dimensions don’t go out of proportion when packed.

These are certainly not absolute values – some luggage with these heights are narrower in which case it might go from “stretched” to “comfortable”.

The only way to be 100% sure is check with the retailer selling you the product (they can test it in the shop) or refer to the guideline above and you will **more-often-than-not** have perfectly fitting Luggage Glove!
